ADDISPACE's answer is the creation of an AM technology dissemination and transfer platform for companies, specifically for SMEs from the aerospace sector of the SUDOE, configuring such a platform as a stable environment and meeting and collaboration point for research centres and the industrial sector, where they can integrate these technologies.

A vast platform, made up of companies (10 partners and 7 associates), is created for such purposes, with profiles in 3 different and complementary categories:

- Universities and echnology centres.
- Clusters.
- Industrial associations and SMEs and Training centres.

Therefore, ADDISPACE's response follows these strategies:

_ **DISSEMINATION**

_ **DEMONSTRATION**

_ **TECHNOLOGY**

_ **TRANSFER**

_ **TRAINING**

RESULTS

Available the Diagnosis and study of additive manufacturing technology opportunities in the aerospace sector of the SUDOE in the website.

-
4 pilot defined for experiments on development and transfer of AM technologies for the study of results.

NEXT TRANSFER WORKSHOPS AND EVENTS

Feb.
2018

Transfer workshop in Seville.

Organized by:
FADA-CATEC,
aimed as AM SMEs,
manufacturers of
metal components and
advanced engineering
services/integrators.

Oct.
2018

Workshop in Marinha Grande.

Organized by:
IP Leiria and
supported by PEMAS.
